

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2022 年 7 月 14 日 (2022, Jul. 14)

Niall MacNeill の画像は、筆者が気にしていた Chryse (35W,+10) と Xanthe (W53,+15) の画像である。この付近がかなりダスティーになっている様子が分かる。前日の 13 日にダストストームが発生していた可能性もありそうに見えるが、結局わからないままになった。リムの北半球と南半球の違いが明瞭で、南半球がダストベールに被われている様子が分かる。

The images of Niall MacNeill are the images of Chryse (35W, + 10) and Xanthe (W53, + 15) that I was interested in. You can see that this area is quite dusty. It seems possible that a dust storm had occurred on the 13th of the previous day, but in the end it remained unknown. The difference between the northern and southern hemispheres of the limb is clear, and it can be seen that the southern hemisphere is covered with a dust veil.

(by 1 observation; reported by Makoto Adachi)
