

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Efrain Morale Rivera の画像は、白が強くて、SPC の周囲のダストは埋もれて見えなくなってしまった。しかし、その反面 Ishidis (270W,+23)が朝霧に覆われている様子をよく記録している。南極付近には、淡いながらも白雲がある。

The image of Efrain Morale Rivera was so white that the dust around the SPC was buried and disappeared. However, on the other hand, it is well recorded that Ishidis (270W, + 23) is covered with morning mist. There are faint white clouds near Antarctica.

(by 1 observation; reported by Makoto Adachi)
