

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2023 年 4 月 15 日 (2023, Apr. 15)

今日は、同じ経度の観測が集まった。どの観測にも共通するのは、火星面がダスティーだということである。模様は淡く、濃く見えない状態になっている。Syrtis Major (293W,+0~20) は白い雲に覆われて、濃さが落ちている。北半球のターミネーター近くは朝霧で白っぽくになっていたが、今日は目立たない状態だった。

Observations at the same longitude were collected today. What all observations have in common is that the surface of Mars is dusty. The pattern is faint and dark, making it difficult to see. Syrtis Major (293W, +0~20) is covered with white clouds and the density is low. The northern hemisphere near the Terminator was washed out by the morning mist, but it was not noticeable today.

(by 4 observations; reported by Makoto Adachi)
