

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024年4月21日 (2024, Apr. 21)

Clyde Foter は Hellas (275~315W, -30~60) を中央付近で記録している。この画僧を見えると Nectar (70W, -23) が、前日よりやや暗く見える。Solis Lacus (W90; -28) のすぐ南にある Foelix (100W, -43) がやや明るく見える。その東西の暗部もはっきり見えている。Ophir (65W, -7) が明るい、特別なものかどうかは、まだわからない。

Clyde Foter recorded Hellas (275~315W, -30~60) near the center. When I see this painter, Nectar (70W, -23) looks a little darker than the previous day. Foelix (100W, -43) just south of Solis Lacus (W90; -28) appears slightly brighter. The dark side to the east and west is also clearly visible. Ophir (65W, -7) is bright, but I don't know if it's anything special yet.

(by 1 observation; reported by Makoto Adachi)
