

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Clyde Foster の画像では、Meridian (0W,-5)の先端の Iani Fre. (15W, -6)付近や Margaritifer Sinus (23W;-10)付近が、ぼんやりしていて、やや明るい。ダストベールが広がっているように見える。眞島の画像は、コントラストが強く、大気の状態が分かりにくい。Ausonia (W235~270,-55~-20)がやや黄色っぽいように見える。

In the Clyde Foster image, the tip of Meridian (0W,-5) near Iani Fre. (15W, -6) and Margaritifer Sinus (23W;-10) are hazy and slightly bright. A dust veil appears to be spreading. Mashima's image has a strong contrast, making it difficult to see the atmospheric conditions. Ausonia (W235~270,-55~-20) appears slightly yellowish.

(by 2 observations; reported by Makoto Adachi)
