

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024 年 7 月 14 日 (2024, Jul. 14)

昨日、Clyde Foster がきろくした Deucalionis Regio (330W~10W,15)付近の異変は、今日も発展した。ダストストームによって暗色模様が隠されたようだが、これほど下の模様が見えないところを見ると、ダストストームといえる。ただ、今回のダストストームは、発生日や発生場所や輪郭もはっきりしない。

The strange phenomenon near Deucalionis Regio (330W~10W,15) that Clyde Foster reported yesterday has developed further today. It seems that the dark pattern was hidden by a dust storm, but the fact that the pattern below is so obscured means that it is a dust storm. However, the date, location and outline of this dust storm are unclear.

これらの画像を見ると、7月12日に Argyre (30W,-50)東方が、やや明るい。発生場所としては Argyre 東方が怪しいが、決定的ではない。7月14日はダストストームはエドム付近から、さらに北に広がっているようで、G画像で、その様子が分かる。

Looking at these images, the area east of Argyre (30W,-50) is slightly bright on July 12. The area east of Argyre is suspected as the source, but this is not conclusive. On July 14, the dust storm seems to have spread from near Edom further north, and this can be seen in the G image.

(by 3 observations; reported by Makoto Adachi)
