

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024年7月19日 (2024, Jyl. 19)

SPCは小さくなり、シーイングが悪かったり、火星の向きがあっていないと、見えなくなっている。観測するときに、火星の南北が合わせにくくなる。この状態でダストストームが起こると、画像の向きが分からないものができるので注意が必要だ。今回集まった観測は、目立った変化は見られなかった。

The SPC has become smaller and is becoming harder to see when the seeing is poor or the direction of Mars is not correct. It becomes difficult to align the north and south of Mars when observing. If a dust storm occurs in this state, the image may become unclear in its direction, so care must be taken. No noticeable changes were observed in the observations collected this time.

(by 2 observations; reported by Makoto Adachi)
