

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024 年 9 月 20 日 (2024, Sep. 20)

この日のダストストームの様子は Clyde Foster と Damian Peach の画像を見ると、だいたいのが分かる。広がり方は、ダストストームの位置を記した地図を参照してほしいが、かなりの広さに及んでいる。残念ながら 100W よりも西の地域は観測がなく、様子を知ることができない。南は Solis Lacus (W90;-28) までは及んでいないようだが、北半球は高緯度に近いところまで広がっているようだ。

The state of the dust storm on this day can be roughly understood by looking at the images by Clyde Foster and Damian Peach. Please refer to the map showing the location of the dust storm to see how it spreads, but it is quite wide. Unfortunately, there have been no observations in the area west of 100W, so we cannot know what it is like. It does not seem to have reached Solis Lacus (W90;-28) in the south, but it seems to have spread to high latitudes in the Northern Hemisphere.

(by 8 observations; reported by Makoto Adachi)
