

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2024 年 10 月 19 日 (2024, Oct. 19)

Eric Sussenbach の画像は、コントラストをつけすぎ、Trivium Charontis (195W, +20)が濃くなりすぎた。もう少し淡いと、ダストベールの広がりが分かったと思われる。眞島の画像は Meridian (0W, -5)がダストの影響を大きく受けている様子を示している。全体が広くベールに覆われているようだ。Clyde Foster の画像では、アルバの雲がこの位置でも確認できた。西没に向かって明るくなるようだ。

Eric Sussenbach's image has too much contrast, making Trivium Charontis (195W, +20) too dark. If it had been a little lighter, the extent of the dust veil would have been visible. Majima's image shows Meridian (0W, -5) heavily affected by dust. It looks like the whole is widely covered by a veil. In Clyde Foster's image, the clouds of Alba can also be seen from this position. It seems to brighten towards the western sunset.
