NPC の中に、光斑が見えている。Michael Wong・Nobuya Migagawa・Satoshi Ito と Mike Karakas の画像に記録された。地形の影響を受けて見えたものかどうかは、まだわからない。伊藤の画像には NPC よりも外側だと思われるが、暗い斑点状の様子が記録されている。画像の端なので、位置は正確に測れないが、Mare Sirenum (140W~170W,-30)の北に位置しているようだ。残念ながら、他の観測者の画像では確認できなかった。

A light spot is visible within the NPC. It was recorded in images by Michael Wong, Nobuya Migagawa, Satoshi Ito, and Mike Karakas. It is not yet clear whether this is due to the influence of the terrain. Ito's image records a dark spot-like pattern that is thought to be outside the NPC. Since it is on the edge of the image, the position cannot be measured accurately, but it seems to be located north of Mare Sirenum (140W~170W,-30). Unfortunately, it could not be confirmed in images by other observers.

(by 13 observations; reported by Makoto Adachi)
