

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 1 月 27 日 (2025, Jan. 27)

カラー画像と IR 画像を重ねると、模様が黒く出てしまい、本当の色が失われてしまうので、IR は IR のみで画像を作成して、カラーだけのものと別々に報告されると、火星の情報を読み取れるようになる。火星は、模様を濃く出すのではなく、模様の濃さや色の違いが出るように処理するとよい。

When a color image and an IR image are superimposed, the patterns appear black and the true colors are lost, so if an IR image is created using only IR and reported separately from the color image, information about Mars can be read. For Mars, it is better to process the image so that the patterns are not made darker, but rather the differences in the darkness and color of the patterns are apparent.
