

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 2 月 12 日 (2025, Feb. 12)

観測は 2 人だけだった。Hellas に入り込んだ雲がやや濃くなった。Efrain Morales Rivera は Tharsis (80W~120W,+10) の 3 火山と Olympus Mons (135W,+25) を赤黒く記録した。Alba (115W.+45) は同じような傾向だが、標高が低い分、抜けが悪く写っている。Tiziano Oliveti の画像では Syrtis Major (293W,+0~20) 付近は良く晴れたため、かなり濃い状態で記録されている。

Only two people observed. The clouds that had entered Hellas became slightly thicker. Efrain Morales Rivera recorded the three volcanoes Tharsis (80W~120W,+10) and Olympus Mons (135W,+25) in dark red. Alba (115W.+45) had a similar tendency, but due to its low altitude, it was not very clear. Tiziano Oliveti's image recorded the area around Syrtis Major (293W,+0~20) as being quite thick because of the clear weather.

(by 2 observations; reported by Makoto Adachi)
