

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 2 月 15 日 (2025, Feb. 15)

今日の観測は、画像に表現されたNPCの大きさにかかなりの差を感じた。露出時間の問題や、カメラのゲインの問題など、同じはずの大きさがずいぶん異なる。北極冠に合わせると、火星面が暗くなってしまふから、火星面の様子の分かる画像と、NPCの様子が分かる画像の両方があれば完璧である。ただ、報告者は大変な作業になるので難しいと思う。

In today's observation, I felt that there was a considerable difference in the size of the NPCs shown in the images. Due to issues such as exposure time and camera gain, the sizes that should be the same are quite different. If we were to align it with the north polar cap, the Martian surface would become dark, so it would be perfect if we had both an image showing the Martian surface and an image showing the NPCs. However, I think this would be difficult as it would be a lot of work for the reporter.

(by 5 observations; reported by Makoto Adachi)
