

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 3 月 13 日 (2025, Mar. 13)

今日は、観測が少なく、2人だけになってしまった。筆者も観測しているが、シーイングが悪く、成果は上げられなかった。Christopher Go の NPC の画像からは、まだ NPC の縁に雲が見える。雲のない側には NPC の縁が記録されていた。地球から見える本当の大きさはかなり小さくなるとともに、火星像の北の端にかなり狭い大きさになっている。

There were few observations today, and only two of us were there. I also observed, but the seeing was poor and I was not able to get any results. From Christopher Go's NPC image, clouds are still visible on the edge of the NPC. The edge of the NPC was recorded on the cloudless side. The actual size seen from Earth becomes much smaller, and the size becomes quite narrow at the northern edge of the Mars image.

(by 2 observations; reported by Makoto Adachi)
