

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 3 月 21 日 (2025, Mar. 21)

今日は、日本の観測者だけの報告になった。日本以外の観測数が最近激減していて、火星全面の様子が把握しにくくなってきた。Syrtis Major (293W,+0~20)付近の低緯度では赤道帯霧が顕著である。この雲は眼視観測ではほとんど見えない。肉眼で見た姿は伊藤の左から 2 番目の画像に近い。

Today, only Japanese observers reported. The number of observations outside of Japan has dropped dramatically recently, making it difficult to grasp the overall state of Mars. Equatorial clouds (ECB) are prominent at low latitudes near Syrtis Major (293W,+0~20). These clouds are almost invisible to the naked eye. The appearance seen with the naked eye is similar to the second image from the left by Ito.

(by 6 observations; reported by Makoto Adachi)
