

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 3 月 24 日 (2025, Mar. 24)

荒川の観測では、南半球の中緯度以南は晴れていて、Eridania (200~230W, -35~-55)などが赤っぽく記録されている。筆者は、かすかだが、Elysium (215W, +30)よりも西が、ダスティーに記録している。これは、赤道帯霧が重なって黄色っぽく感じたようだ。この様子は Con Kolivas のカラー画像で見ることができる。NPC は周縁部に雲がかかっているようで、輪郭がぼやけて記録されている。Atlantidum (180W, -25)が Con kolivas の IR 画像によって、暗く記録されている。肉眼でも薄暗く観測されていたが、前シーズンよりも、少し暗くなったようだ。

According to Arakawa's observations, it was clear south of the mid-latitudes in the Southern Hemisphere, and Eridania (200~230W, -35~-55) was recorded as reddish. The author recorded the area west of Elysium (215W, +30) as dusty, although faintly. This seems to have been yellowish due to the overlapping of equatorial fog. This can be seen in the color image of Con Kolivas. NPC seems to have clouds on the periphery, and its outline is recorded as blurred. Atlantidum (180W, -25) was recorded as dark in the IR image of Con Kolivas. It was observed as dim even with the naked eye, but it seems to have become a little darker than the previous season.

(by 7 observations; reported by Makoto Adachi)
