

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 3 月 25 日 (2025, Mar. 25)

Elysium (215W,+30)が白く明るく記録されていて、台地全体が雲に覆われているらしい。ここから南西の方向にも雲が連なっている。赤道帯霧が観測されるようになって以来、この傾向はずっと続いたままになっている。反対側の Chryse (35W,+10)から Tharsis (80W~120W,+10)方面の雲と似た状態になっている。Olympus Mons (135W,+25)はリムの位置でかなり明るくなって記録されている。

Elysium (215W, +30) is recorded as bright white, and the whole plateau seems to be covered with clouds. Clouds are also lined up in the southwest direction from here. This trend has continued steadily since equatorial fog was observed. It is in a similar state to the clouds from Chryse (35W, +10) to Tharsis (80W~120W, +10) on the opposite side. Olympus Mons (135W, +25) is recorded as being considerably brighter at the limb position.

(by 10 observations; reported by Makoto Adachi)
