

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 3 月 31 日 (2025, Mar. 31)

日本では、模様のみえない位置での観測になった。前日の井上の観測で見られた NPC は荒川の観測でもダストの色になっている。この様子は、昨日に続いて井上も記録し、高尾もかなり黄色く観測している。筆者は Alba (115W.+45) うい明るく見ているが、その北側にぼやけた光斑を見ている。NPC が黄色っぽいことと関係があるかもしれないが、同時観測がない。

In Japan, the observation was made in a location where the pattern was not visible. The NPC seen in Inoue's observation the previous day was also the color of dust in Arakawa's observation. Inoue recorded this pattern again yesterday, and Takao also observed it as being quite yellow. The author sees Alba (115W.+45) as bright, but sees a fuzzy light spot to the north of it. This may be related to the yellowish color of the NPC, but there has been no simultaneous observation.

(by 5 observations; reported by Makoto Adachi)
