

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

Frank J. Melillo の画像では Propontis (180w,+45)の暗斑が、コントラストがついて、かなり黒く記録された。晴れの範囲に入ったためだろう。Mark Lonsdale はN P Cが Utopia (260W,+45)方面が見えにくくなっている様子を記録している。白さはなく、ダスト混じりの白雲らしい。ヘラス周辺は青白い雲に覆われている。

In the image by Frank J. Melillo, the dark spot of Propontis (180w, +45) was recorded as being quite black with contrast. This is probably because it entered the clear area. Mark Lonsdale recorded that the NPC was having difficulty seeing the direction of Utopia (260W, +45). There was no whiteness, and it seemed to be a white cloud mixed with dust. The area around Hellas was covered with pale blue clouds.

(by 2 observations; reported by Makoto Adachi)
