

Black letters are mainly descriptions of patterns.

Blue letters are descriptions of polar caps and clouds.

Brown letters are the description about dust.

Red is a special note.

2025 年 8 月 22 日 (2025, Aug. 22)

Frank J Melillo から IR 観測が送られてきた。Mare Acidarium (20~45W,+40~55)の姿が面白い。北から南まで黒い模様が南北に見え、Mare Acidarium の西半分は良く晴れていることを示している。Niliacus Lacus (20~40W,+30) も濃くはっきり写っている。今までとは違った見え方である。NPC の周囲が白っぽいのは、雲による影響を受けているのだろう。

I received IR observation data from Frank J. Melillo. The image of Mare Acidarium (20-45W, +40-55) is quite interesting. A dark pattern extends from north to south across Mare Acidarium, and the western half of Mare Acidarium appears to be clear. Niliacus Lacus (20-40W, +30) is also clearly visible. This is a different view than we've seen before. The whitish area around NPC is likely due to cloud cover.

(by 1 observation; reported by Makoto Adachi)
